

Continents and Oceans

Read the passage below and answer the following questions.

Continents are large land masses on Earth, and there are seven of them. They are North America, South America, Africa, Europe, Asia, Australia, and Antarctica. Each continent has its own unique features, such as diverse cultures, landscapes, and wildlife.

Oceans, on the other hand, are vast bodies of saltwater that cover most of the Earth's surface. There are five oceans: the Atlantic Ocean, Pacific Ocean, Indian Ocean, Southern Ocean, and Arctic Ocean. Oceans are home to a wide variety of marine life and play a crucial role in regulating the Earth's climate.

1) How many continents are there?

2) What are some unique features of continents?

3) How many oceans are there?

4) Name one ocean that you are familiar with.
